Subject: WWTP Groundwater Monitoring – Professional Service Agreement BSK Associates

The Issue

Shall the City approve a contract with BSK Associates for one year for groundwater monitoring at the Wastewater Treatment Plant?

Conclusions and Recommendation

Staff recommends that City Council by **RESOLUTION** authorize the Director of Public Works to execute a contract with BSK Associates to perform groundwater monitoring at the Wastewater Treatment Plant.

Background

The City's National Pollutant Discharge Elimination System (NPDES) permit for the Wastewater Treatment Plant issued by the Central Valley Regional Water Resources Control Board (Regional Board) in September 2010 continues to require quarterly groundwater monitoring at the Wastewater Treatment Plant per the City's waste discharge permit. In addition to the quarterly monitoring reports, the new NPDES permit requires that Title 22 constituents be analyzed on a semi-annual basis which has added a considerable increase in laboratory costs.

BSK Associates has successfully performed the groundwater monitoring to date and City staff feels they are qualified and familiar with the WWTP to continue these service.

Alternatives Available to Council; Implications of Alternatives

1. Authorize the consultant agreement.
2. Take no action.

Fiscal Impact

The 2010/2011 Budget included funding for the groundwater monitoring in the Sewer Budget. The proposal from BSK Associates totals \$59,896 for one year of groundwater monitoring.

11. INSURANCE

- 11.10 Any deductibles or self-insured retentions must be declared to and approved by the City. - 11.11 Procurement of insurance by Consultant shall not be construed as a limitation of Consultant's liability or as full performance of Consultant's duties to indemnify, hold harmless and defend under Section 10 of this Agreement.

12. MUTUAL COOPERATION

- 12.1 City shall provide Consultant with all pertinent data, documents and other requested information as is reasonably available for the proper performance of Consultant's services under this Agreement.

EXHIBIT A SCOPE OF WORK

BSK Proposal ES11-5414

Groundwater Monitoring and Reporting Services for 2011 City Of Auburn Wastewater Treatment Plant Auburn, California

SCOPE OF SERVICES

Task 1: Quarterly Groundwater Monitoring

For each quarter in 2011 (four quarters total), BSK will perform the following scope of services:

The BSK project manager will schedule the field activities each quarter to ensure enough time is allowed for groundwater samples to be collected and analyzed in accordance with the MRP. BSK will coordinate the proposed schedule with the Wastewater Treatment Plant Manager.

Once on site, the BSK sampling technician will check in with the Wastewater Treatment Plant Manager or designee. The following tasks will be performed by the technician:

- Each well will be opened and allowed to equilibrate to atmospheric pressure for approximately 30 minutes.
- Depth to groundwater in each monitoring well will be measured using a conductivity based water level indicator meter and logged on a field form.
- Prior to sampling, the monitoring wells will be purged of at least approximately three casing volumes. The purge water will be discharged to the land surface in a location and manner that will not allow the run-off to enter the well.
- The appropriate sample bottles will be labeled, filled and stored in an ice chest. The samples will be logged on a chain of custody and transported to BSK's laboratory.

All non-disposable field equipment will be washed with a non-phosphate detergent solution and thoroughly rinsed with distilled water before and after each well is sampled. The samples will be collected using one-time use disposable bailers and analyzed for the list of constituents described in Task 2, below.

Task 2: Laboratory Analyses

Groundwater samples collected from the five monitoring wells will be sent to BSK's laboratory in Fresno, California under chain-of-custody control protocols. Groundwater samples collected in the first and third quarters of each year will be analyzed by BSK's state-certified laboratory for the following parameters:

- Metals: Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Calcium, Copper, Iron, Magnesium, Manganese, Potassium, Silver, Lead, Molybdenum, Nickel, Selenium, Strontium, Tin, Thallium, Vanadium, and Zinc.

Groundwater samples collected in the second and fourth quarters will be analyzed by BSK's state-certified laboratory for the following parameters:

- Chemical Oxygen Demand (COD),
- Total Organic Carbon (TOC),
- Ammonia (NH₃) and Ammonia Ion (NH₄),
- Nitrate as N,
- Total Kjeldahl Nitrogen (TKN),
- Chloride,
- Sodium Absorption Ratio (SAR),
- Total Phosphorus,
- General Minerals: Alkalinity, Bicarbonate (HCO₃), Calcium, Carbonate (CO₃), Electrical Conductivity (EC), Copper, Hardness, Hydroxide (OH), Iron, Magnesium, Manganese, pH, Potassium, Silver, Sodium, Sulfate, Surfactants, TDS, Zinc,
- Additional Metals by EPA method 200.7: Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Lead, Molybdenum, Nickel, Selenium, Strontium, Tin, Thallium, and Vanadium,
- Total Coliform Organisms,
- Fecal Coliform, Fecal Streptococcus, and Escherichia Coliform, and
- Title 22 Constituents not included above (EDB, DBCP, organohalide pesticides and PCBs, organonitrogen/organophosphorus pesticides, chlorinated herbicides, volatile organics, semi-volatile organics, carbamate pesticides, glyphosate, endothall, diquat, dioxin, trihalomethanes, MTBE, fluoride, cyanide, asbestos, corrosivity, and general physical properties).

Task 3: Quarterly Report Preparation

Upon completion of field work and laboratory analysis for each quarter, BSK will prepare a quarterly groundwater monitoring report in accordance with the Regional Water Quality Control Boards Standard Provisions and Reporting Requirements for Waste Discharge Requirements. Each report will include a description of activities conducted during that quarter, the condition of the wells, depth to groundwater, groundwater gradient and flow direction, laboratory analytical result summary tables, graphical representations of the site and groundwater elevation contours, along with conclusions and recommendations. The fourth quarter report will recap the groundwater monitoring activities undertaken during the year and include an assessment of any trends observed with regards to groundwater gradient and groundwater quality. The reports will be prepared under the direction of, and signed and stamped by, a Professional Engineer or Geologist licensed in California.

Task 4: Project Management/Regulatory Agency Interaction

BSK has budgeted time to accommodate for periodic meetings with the City and/or Water Board staff to provide status updates, to ensure the objectives expected by the Water Board are met, and to act as the City's advocate regarding groundwater monitoring and analysis aspects of the General Order.

PROJECT SCHEDULE

BSK will commence with our services upon written authorization to proceed. Analytical laboratory tests will be scheduled on a standard (two-week) turnaround basis. We anticipate that the field work will be completed during the second month of each quarter and the report will be provided to the City by the 14th day of the month following each half.

FEES

BSK will perform the Scope of Work in accordance with the Estimate of Fees indicated on Pages 4 and 5. Any additional work items outside of the Scope of Services described in this proposal will be performed at additional cost in accordance with the unit rates indicated in the Estimate of Fees. We will not exceed the estimated fee for additional services without prior notification and approval by the City.

LIMITATIONS

This proposal has been prepared using the information currently included in the current WDR. Any changes in the requirements stated in the WDR for groundwater monitoring will be communicated directly to the City of Auburn. If changes to the WDR (e.g., additional sampling locations or analysis) require additional services beyond those stated in this proposal, then an addendum to this contract will be prepared by BSK and submitted to the City for approval before any additional services are undertaken.
